#### **Use of Non-GAAP Financial Information**

This press release contains non-GAAP financial measures. Ultimate believes that non-GAAP measures of financial results provide useful information to management and investors regarding certain financial and business trends relating to Ultimate's financial condition and results of operations. Ultimate's management uses these non-GAAP results to compare Ultimate's performance to that of prior periods for trend analyses, for purposes of determining executive incentive compensation, and for budget and planning purposes. These measures are used in monthly financial reports prepared for management and in quarterly financial reports presented to Ultimate's Board of Directors. These measures may be different from non-GAAP financial measures used by other companies.

These non-GAAP measures should not be considered in isolation or as an alternative to such measures determined in accordance with generally accepted accounting principles in the United States (GAAP). The principal limitation of these non-GAAP financial measures is that they exclude significant expenses that are required by GAAP to be recorded. In addition, they are subject to inherent limitations as they reflect the exercise of judgment by management about which expenses are excluded from the non-GAAP financial measures.

To compensate for these limitations, Ultimate presents its non-GAAP financial measures in connection with its GAAP results. Ultimate strongly urges investors and potential investors in Ultimate's securities to review the reconciliation of its non-GAAP financial measures to the comparable GAAP financial measures that are included in this press release (under the caption "Unaudited Reconciliation of Non-GAAP Financial Measures to GAAP Financial Measures") and not to rely on any single financial measure to evaluate its business.

Ultimate presents the following non-GAAP financial measures in this press release: non-GAAP operating income, non-GAAP operating income, as a percentage of total revenues (or non-GAAP operating margin), non-GAAP net income and non-GAAP net income, per diluted share. We exclude the following item from these non-GAAP financial measures as appropriate:

Stock-based compensation expense. Ultimate's non-GAAP financial measures exclude stock-based compensation expense, which consists of expenses for stock options and stock and stock unit awards recorded in accordance with Accounting Standards Codification 718, "Compensation – Stock Compensation." For the three and six months ended June 30, 2013, stock-based compensation expense was \$7.8 million and \$15.4 million, on a pre-tax basis. For the three and six months ended June 30, 2012, stock-based compensation expense was \$4.9 million and \$9.2 million, on a pre-tax basis. Stock-based compensation expense is excluded from the non-GAAP financial measures because it is a non-cash expense that Ultimate does not consider part of ongoing operations when assessing its financial performance. Ultimate believes that such exclusion facilitates the comparison of results of ongoing operations for current and future periods with such results from past periods. For GAAP net income periods, non-GAAP reconciliations are calculated on a diluted weighted average share basis.
